Education

Master of Science ▪ Computer Science **3.9 GPA ▪** 2024
Georgia Institute of Technology: Computing Systems specialization

Bachelor of Science ▪ Computer Engineering ▪ Computer Science **3.9 GPA ▪** 2020
Elizabethtown College

Experience

Software Engineer Sr ▪ Lockheed Martin June 2020 - Present

- **Full-stack** engineering of containerized microservices using Docker, Kubernetes, and Helm across multiple contracts under the Whiskey portfolio of Space
- Agile scrum master planning of projects spanning multiple teams and contractors
- Trusted maintainer empowering complex cross-team development and problem solving
- **Top Secret/SCI Department of Defense security clearance**
- Technical lead of contract to develop capabilities for what-if, space-based scenarios and response plans to positional updates
- Developed and visualized war sim algorithms for space, aerial, terrestrial, and aquatic assets
- Javascript/Java backends integrating Liquibase driven PostgreSQL databases, RESTful APIs, Redis caches, and Apache ActiveMQ and Apache Kafka event streams
- Javascript component-based micro-frontends written in LitElement, Angular, and React following material design
- Maintained and developed tests for FIT and E2E suites using Cucumber, Jasmine, and Playwright
- Leveraged the development efficiencies and safety of linting and IntelliSense to every repository
- Recognized as peer of the release 2022 for going above and beyond to deliver stable software

Undergraduate Research ▪ Rutgers University May 2019 - August 2019

- Algorithmically developed ‘Graph Stories’ by summarizing corpora generated from massive graphs
- NSF funded individual research applied to graph sense-making projects currently in development
- User interface design and testing for ATLAS and Graph Wave applications

Engineering TA ▪ Elizabethtown College Jan 2018 - May 2020

- Engineering/Science lab assistant and tutor in charge of assessing student code, circuits, models, etc.

Projects

Cosmic

- Fully emulated, lightweight, and cross-platform 8-bit computer architecture designed in C++ with a RISC-like instruction set derived from Zilog Z80 and MOS 6502 microprocessors. Rich GUI developed with ImGUI for debugging/testing. Assembler written in Python. Automated CI/CD. Open source

DiddyBot

- General purpose Discord bot written in Javascript, running on node.js, using the Discord.js framework
- MySQL statefulness. RESTful API integration. Over 50 unique commands of varying complexity from reminders to a logarithmic user interactions based leveling system and economy. Serving over 250 users

Technical Skills

Languages: JavaScript ▪ TypeScript ▪ SQL ▪ Python ▪ Java
Tools/Software: Kubernetes ▪ Helm ▪ Docker ▪ AWS ▪ Git ▪ LitElement ▪ Angular ▪ Jasmine ▪ Playwright ▪ Cucumber ▪ Linux ▪ Rancher ▪ Redis ▪ Apache ActiveMQ ▪ Apache Kafka ▪ MS Office
